

Cricket Stump Wrapping Guide

General Instructions for Applying SAV to Stumps.

- Sticky Wicket provides you with a set of fully printed and laminated SAV stickers for your cricket stumps.
- To apply these, first, using a pencil mark the centre line of one of side of the stump bail groove, do the same with the bottom of the stump. Make these marks around 1cm away from the bail groove and bottom.
- Peel the paper backing off the sticker, take the left and right corners of the sticker, place in line with the marks you have made.
- Run finger along the edge once the sticker is lined up correctly. gently rotate the stump and continue to use pressure from your hand to wrap the stump in a clockwise motion.
- This process will leave a 3-5mm overlap at one edge of the stump. This is perfectly normal and cannot be seen front on, making no difference to the final graphic either side of the stump.

ALLOW VINYL TO REST FOR 24hrs BEFORE MATCH PLAY

Apply pressure with palm of hand whilst wrapping in an up and down motion!

- Any bubbles can be pin-pricked to remove the air trapped inside. Ripples at the top and bottom of the stump can be dispersed with a gentle application of heat.
